PROFILE

I am a Front-End Developer with a background in classical cello performance. I strive to use my creativity alongside my strong work ethic and attention to detail in order to build accessible applications and write clean code. As the world of Web Development is ever-changing, I am inspired every day to continue learning and improving.

EDUCATION

Juno College of Technology | 2019-2020

Web Development Immersive

Accelerated JavaScript

Accelerated Web Development

WORK EXPERIENCE

Web Development Mentor | May 2020-Present

Juno College of Technology

- Helps a class of 40+ students to debug and problem solve in writing their first lines of HTML and CSS.

Assistant Principal Cello | September 2016-Present

Kitchener - Waterloo Symphony

- Leads the cello section of the orchestra, has led 200+ performances over the past 3 years.
- Plays for audiences of over 2000 people per performance.
- Communicates with the conductor and the other principal players of the symphony.

RECENT PROJECTS

Chirptronome | React | Firebase | SCSS

A chirping metronome that allows the user to select a tempo and meter. It gives them the opportunity to save these values for later, in addition to the title and composer of the music that they're playing.

<https://sarahmgans.github.io/chirptronome/>

The Perfect Apple for You | HTML | SCSS | jQuery | JavaScript

A generator that produces the perfect apple for the user based on their selection of apple properties. The generator has 18 potential choices of apple for the user.
